Reducing the Total Cost to Own, Integrate & Develop Weighing Solutions Into Process Manufacturing

YOUR BUSINESS NEED:

You've been looking to deploy a weighing solution to upgrade your manufacturing system. You need to:
- Increase productivity
- Reduce costs
- Improve product quality
- Respond faster to your customer's needs

Hardy lowers the total cost to OWN, INTEGRATE, and DEVELOP weighing applications.   Here's how:

OWN & OPERATE: less WASTE, less RISK, more PRODUCTIVITY

- Eliminate expensive and time consuming calibration with fast, easy and accurate electronic calibration – Hardy C2®
- Decrease downtime with internet tools to trouble shoot and diagnose – Webserver® and INTEGRATED TECHNICIAN®
- Increase measurement stability to reduce cycles times and increase throughput – WAVERSAVER®
- EASY to use operator interfaces make training efficient and use simple – No manuals required!

INTEGRATE: Less time to configure, connect and integrate to automation

- Rockwell Add-On-Profiles for compatibility with RSLogix
- Wide range of standard fieldbus communications available
- Flexible I/O configurations
- Validated integration tools
- Easy setup and configuration
- Open-architecture for data logging and reporting

DESIGN, DEVELOP & DELIVER: Fewer hours for engineering, scalable, easier to implement

- Variety of instruments and sensors scalable to the economy of your machines
- Open-architecture allows complete freedom of design
- Weight processing, controls, and intelligence are built into the instruments and modules
- Scalable, intelligent modules plug into the backplane and are easy to design into system
- Validated integration tools for easy configuration
- FREE phone support from experts in process weighing

Our Hardy Service Center is customer-focused and provides solutions that are valued by our customers. We offer a unique blend of support options that gives you the ability to respond to your needs. Hardy is ready to join your team whenever and wherever you need us.
